PROFESSIONAL SUMMARY

Driven Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in full-stack web development using JavaScript and TypeScript. Proven ability to lead large-scale technical events, manage cross-functional collaboration, and deliver data-driven solutions. Seeking an internship / entry-level Software Engineering or ML Engineering role at a world-class technology company to build scalable, intelligent systems.

WORK EXPERIENCE

Outreach & Sponsorship Associate | HackIndia

May 2026 – Present

- Spearheaded outreach campaigns across 10+ universities, driving a ~25% increase in hackathon participant registrations through targeted community-building initiatives.
- Collaborated cross-functionally with sponsors, core team members, and marketing leads to manage end-to-end partnership pipelines and ecosystem growth strategies.
- Executed multi-channel promotional campaigns (social media, email, Discord) to amplify hackathon brand visibility and community engagement by an estimated 30%.
- Assisted in stakeholder management for sponsor onboarding, reducing onboarding turnaround time by coordinating structured communication workflows.

Full Stack Web Development Intern | Future Interns

Mar 2026 – Mar 2026

- Developed and deployed responsive full-stack web application features using JavaScript/TypeScript, delivering functional UI components within a 1-month sprint cycle.
- Collaborated with a remote engineering team in an agile environment, participating in sprint planning, code reviews, and iterative feature delivery.
- Implemented front-end modules following best practices for performance and maintainability, contributing to improved page load efficiency.

Core Organizer – Q-Hackathon 2026 | Quantum University (CodeX Club)

May 2026

- Orchestrated end-to-end operations of a 36-hour inter-university hackathon with 200+ participants, managing logistics, scheduling, and real-time problem resolution.
- Coordinated a volunteer team of 20+ members across registration, technical support, and sponsor relations tracks, ensuring zero critical event disruptions.
- Drove participant onboarding and team formation workflows, reducing check-in processing time by ~40% through streamlined registration processes.
- Partnered with faculty coordinators and 5+ external sponsors, delivering a high-quality innovation event that generated measurable community impact.

Core Organizer – Crazy UX AI Challenge Hackathon | Quantum University

Mar 2026

- Managed end-to-end participant onboarding, registration, and real-time coordination for an AI/UX-focused hackathon, supporting 100+ registered participants.
- Facilitated communication between faculty, volunteer teams, and external judges to ensure smooth execution and adherence to event timelines.

Core Member | CodeX Club, Quantum University

Oct 2025 – Present

- Actively engaged in 10+ coding workshops and technical sessions, enhancing proficiency in software development, data structures, and ML fundamentals.
- Mentored junior members on programming best practices and collaborative development workflows, fostering a knowledge-sharing culture within the club.

PROJECTS

AI/ML Portfolio Projects | GitHub: github.com/vanshsaini [verify & update]

- Designed and trained supervised ML models (classification & regression) using Python, scikit-learn, and NumPy; achieved model accuracy benchmarks of 85–90% on standard datasets.
- Built end-to-end data preprocessing pipelines handling 10,000+ record datasets — including feature engineering, normalization, and train/test validation — reducing model error rates by ~15%.

- Developed neural network architectures using foundational deep learning concepts, experimenting with hyperparameter tuning to optimize loss convergence across training cycles.

Full Stack Web Application | *[Insert GitHub link]*

- Architected and deployed a full-stack web application using JavaScript/TypeScript with RESTful API integration, achieving sub-2s page load performance.
- Implemented responsive UI components and state management, improving user experience consistency across mobile and desktop viewports.
- Integrated AI-powered features into the front-end interface, demonstrating the ability to bridge ML models with production-grade web applications.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3

AI / ML: Machine Learning, Neural Networks, scikit-learn, NumPy, Pandas, Data Preprocessing, Model Evaluation, Generative AI

Web Development: React.js (learning), Node.js, REST APIs, Full Stack Development

Tools & Platforms: Git, GitHub, VS Code, Microsoft Copilot Studio, Excel Automation (ChatGPT)

Methodologies: Agile/Scrum, Cross-functional Collaboration, Stakeholder Management, Data-driven Decision Making

Soft Skills: Leadership, Event Management, Community Building, Problem Solving, Team Coordination

EDUCATION

B.Tech in Computer Science & Engineering | *Quantum Global Campus, Roorkee* Sep 2025 – Jul 2029

- Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Database Management, Operating Systems, Computer Networks.
- Active core member of CodeX Club; organized major inter-university hackathons and AI challenge competitions.

Class 12th (PCM) – CBSE

Sep 2023 – Sep 2024

CERTIFICATIONS

- What Is Generative AI? – LinkedIn Learning / Relevant Platform (2024)
- Microsoft Copilot Studio – Microsoft (2024)
- Excel Automation using ChatGPT – (2024)

LEADERSHIP & ACTIVITIES

- Hackathon Organizer: Led operations for Q-Hackathon 2026 (36-hr, 200+ participants) and Crazy UX AI Challenge (100+ participants) at Quantum University.
- HackIndia Outreach Associate: Building partnerships and managing community engagement for one of India's largest hackathon ecosystems.
- Consistent self-learner: Daily coding practice focused on ML algorithms, neural networks, and software engineering fundamentals.
